	Application No.	Applicant(s)					
Office Action Comments	10/588,465	DOOLEY ET AL.					
Office Action Summary	Examiner	Art Unit					
	Robert Williams	3679					
The MAILING DATE of this communication app Period for Reply	ears on the cover sheet with the c	orrespondence address					
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).							
Status

DETAILED ACTION

Election/Restrictions

- 1. Applicant's election without traverse of invention I, claims 1-7 in the reply filed on 7/28/10 is acknowledged.
- 2. Claims 8-18 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 7/28/10.

Information Disclosure Statement

3. The information disclosure statement filed 8/1/06 fails to comply with the provisions of 37 CFR 1.97, 1.98 and MPEP § 609 because the foreign search reports identified have not been properly cited. No indication has been given as to what application(s) they were related to, and how, if at all, said applications are related to the instant application. It has been placed in the application file, but the information referred to therein has not been considered as to the merits. Applicant is advised that the date of any re-submission of any item of information contained in this information disclosure statement or the submission of any missing element(s) will be the date of submission for purposes of determining compliance with the requirements based on the

time of filing the statement, including all certification requirements for statements under 37 CFR 1.97(e). See MPEP § 609.05(a).

Claim Rejections - 35 USC § 112

- 4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 5. Claims 5 and 7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
- 6. Claim 5 recites the limitation "the sealing groove." There is insufficient antecedent basis for this limitation in the claim. Is this the same as or in addition to the "second seal groove" recited earlier in the claim? If there is a second seal groove, is there a first seal groove?
- 7. Claim 7 is indefinite because it is not clear whether applicant is claiming a combination (tube retainer and device) or a sub-combination (tube retainer). The preamble of claim 7 indicates that it is drawn to the tube retainer only, but the claim positively recites "said holding clamp is attached to a device," where said device is not a part of the claimed invention. Further, claim 7 is not a proper dependent claim from

Art Unit: 3679

claim 1, because the device is not a part of the tube retainer defined by claim 1, therefore claim 7 does not further limit claim 1. As best understood, claim 7 is intended to be drawn to the combination. Appropriate correction is required. One possible correction would be to replace the preamble of claim 7 with the following: "An assembly including the tube retainer of claim 1."

Claim Rejections - 35 USC § 102

- 8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:
 - A person shall be entitled to a patent unless –
 - (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 9. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by applicant's admitted prior art.
- 10. Regarding claim 1, applicant's admitted prior art discloses a tube retainer comprising:
- a tube (6) having a retention groove (bounded by shoulder 4 and the sealing ring, as shown in Fig. 1) formed in an external surface, adjacent an open end, of said tube, and
 - a holding clamp (8) adapted to engage said retention groove.

Application/Control Number: 10/588,465 Page 5

Art Unit: 3679

11. Regarding claim 2, applicant's admitted prior art further discloses the retention groove is annular (Fig. 1).

- 12. Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent 4,193,948, Charmley et al. (Charmley '948).
- 13. Regarding claim 1, Charmley '948 discloses a tube retainer comprising:

 a tube (20) having a retention groove (32) formed in an external surface, adjacent
 an open end, of said tube (Fig. 2), and

a holding clamp (70) adapted to engage said retention groove.

- 14. Regarding claim 2, Charmley '948 further discloses the retention groove is annular (Fig. 3).
- 15. Regarding claim 3, Charmley '948 further discloses the holding clamp is a flat plate having a slot formed therein for engaging the retention groove (Figs. 2 & 3).
- 16. Regarding claim 4, Charmley '948 further discloses the slot is open ended such that it is formed from the peripheral edge of the flat plate (Fig. 3).
- 17. Regarding claim 5, Charmley '948 further discloses the tube further comprises a seal groove (24) formed in the external surface thereof interposed between the retention groove and the open end of the tube (Fig. 2), wherein the seal groove is adapted to receive sealing means (26).

- 18. Regarding claim 6, Charmley '948 further discloses the sealing means is an Oring (column 2, line 24).
- 19. Regarding claim 7, Charmley '948 further discloses the holding clamp is attached to a device (40), said device having an inlet/outlet port (42) therein for receiving said tube.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert Williams whose telephone number is (571)270-1155. The examiner can normally be reached on Mon-Thurs 9:30-7:00, Fri 9:30-2:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Daniel P. Stodola can be reached on 571-272-7087. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
